

ON-SITE TOOL TRAILER SERVICE

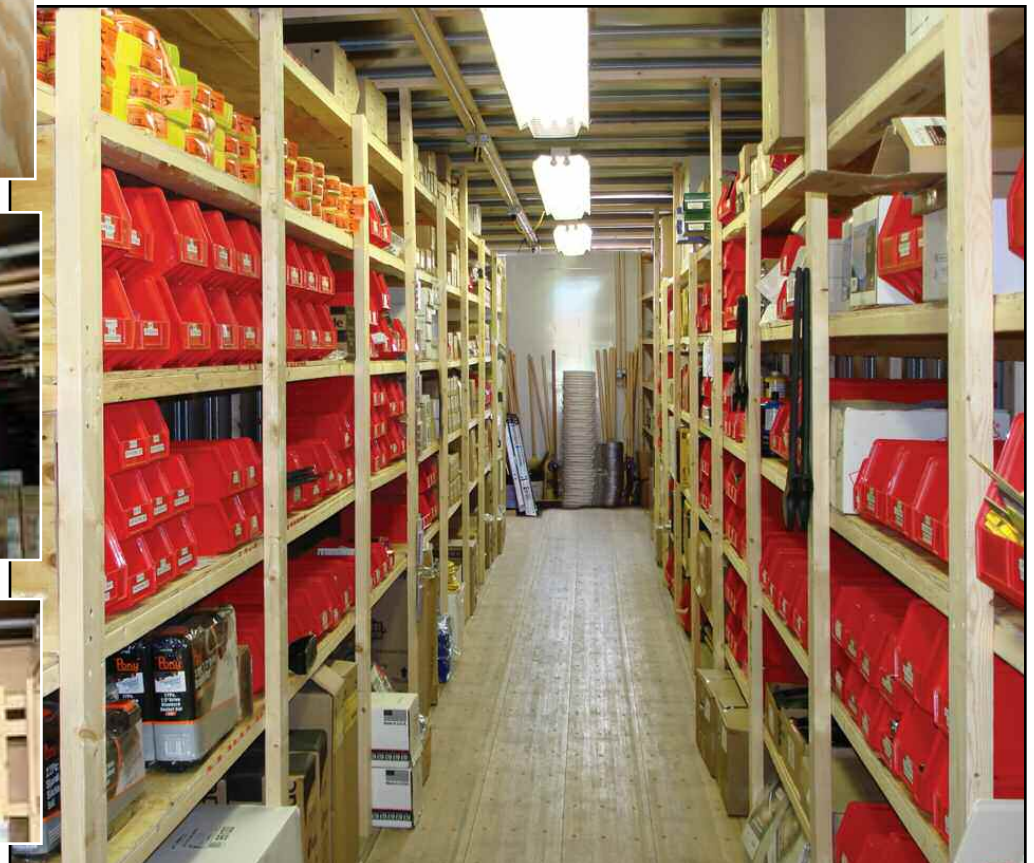

- Outages • Turnarounds
- Shut Downs
- Any Construction Projects

Midland Tool and Supply can provide large projects with on-site consignment tool trailers, with 24 hour access, where your high demand needs are met immediately.

Midland Tool trailers are well organized with sufficient shelving and stackable plastic bins, that are labeled with description and part number. This system gives items an exact place for easy replenishment. Our trailers have special features, such as e-track hanger posts for air hose whips, stingers, grounds, or nylon slings.

As you can see inside, our commitment to organization in our warehouse is also carried over into our tool trailers. Our warehouse is filled with adequate inventory maintained to keep up constant support of tool trailer replenishment; in some instances we also maintain dedicated (job specific) warehouse inventory.

Much of our equipment is based around the needs of the heavy industrial contractor, with all industrial grade tools.

Midland Tool provides more than just a tool trailer; we provide a complete tool and consumable trailer management service. Midland is there for you, from the initial order and delivery of the trailer, to inventory accountability and trailer introduction. The project begins and so does our communication with management, superintendents and craft to ensure your project stays on budget and on time with having the right tools and consumables available 24/7.
